

Ultra Precise FDM 3D Printed Parts For Industrial Prototyping And Production

Our Product Introduction

for more products please visit us on precision-cncparts.com

Basic Information

- Place of Origin: guangdonghuizhou
- Brand Name: ywy
- Model Number: ywy222

Product Specification

- Application: Industrial
- Printing Technology: FDM
- Surface Finish: Smooth
- Tolerance: $\pm 0.2\text{mm}$
- Size: Customized
- Material: PLA
- File Format: STL, IGS, STP
- Printing Layer: 0.2mm
- Highlight: **Production 3D Printed Parts,
Ultra Precise 3D Printed Parts,
Industrial Prototyping 3D Printed Parts**

Product Description

Product Description:

Our 3D printed components are made using the latest in 3D printing technology. Using FDM printing, we are able to create parts with incredible precision and detail. This makes our parts perfect for a variety of applications, from small hobby projects to large-scale commercial endeavors.

Our 3D printed parts are made from PLA material, which is known for its durability and strength. This material is perfect for creating parts that need to withstand everyday wear and tear, and it is also environmentally friendly.

Our 3D printed components are designed using SolidWorks, one of the most popular 3D design software programs on the market. This software allows us to create custom parts that meet the exact specifications of our customers.

We offer our 3D printed parts in a variety of file formats, including STL, IGS, and STP. This makes it easy for our customers to use our parts with a variety of different software programs and 3D printers.

One of the best things about our 3D printed components is that we have no minimum order quantity. Whether you need just one part or hundreds, we can provide you with exactly what you need.

So if you're looking for high-quality 3D printed parts, look no further than our 3D printed parts product. With our advanced technology, quality materials, and expert design abilities, we can create custom parts that meet your exact needs and specifications.

Features:

Product Name: 3D Printed Parts

Surface Finish: Smooth

Tolerance: $\pm 0.2\text{mm}$

Size: Customized

Color: White

Lead Time: 7-10 Days

Check out our other *Three-Dimensional Products* in our 3D Printing Products collection!

Technical Parameters:

Design Software:	SolidWorks
Application:	Industrial
Printing Layer:	0.2mm
Surface Finish:	Smooth
Lead Time:	7-10 Days
MOQ:	1 Piece
Printing Technology:	FDM
File Format:	STL, IGS, STP
Size:	Customized
Material:	PLA

Our company offers high-quality three-dimensional prints, 3D printed goods, and 3D printing products with the above technical parameters.

Applications:

The ywy 3D Printed Parts are perfect for a variety of applications. They can be used for prototyping and testing purposes in the manufacturing industry. The 3D Printed Components can also be utilized in creating home decor and art pieces as they can be customized to fit the desired design.

These Three-Dimensional Parts can also be used in the automotive industry for creating car parts and accessories. The ywy222 model is known for its durability and strength, making it a reliable choice for creating functional car parts.

The ywy 3D Printed Parts can also be used in the medical industry for creating customized prosthetics and implants. The ability to create precise and accurate 3D Printed Components makes it possible to create prosthetics and implants that are tailored to the patient's specific needs.

In the aerospace industry, the ywy222 model is a popular choice for creating lightweight and durable parts for spacecraft and satellites. The 3D Printed Parts are able to withstand extreme temperatures and conditions, making them ideal for use in space.

The ywy 3D Printed Parts have a lead time of 7-10 days, making them a quick and efficient option for those in need of parts quickly. The white color of the parts allows for easy customization and painting.

In conclusion, the ywy 3D Printed Parts are versatile and reliable options for a variety of industries. The ability to create customized and precise Three-Dimensional Parts makes them a popular choice for prototyping, manufacturing, home decor, automotive, medical, and aerospace applications.

Customization:

Our 3D Printing Products offer customizations for our ywy brand Three-Dimensional Parts. Our Model Number ywy222 is manufactured in our factory located in guangdonghuizhou.

We offer a range of color options for our 3D Printed Goods, including White. Our Lead Time is typically 7-10 Days from the time of order.

We use FDM Printing Technology to ensure a high-quality finish for our products. Our Surface Finish is Smooth, with a tolerance of

±0.2mm.

Support and Services:

The 3D Printed Parts product comes with the following technical support and services:

Expert assistance with product installation and setup

Access to online resources, including user manuals and troubleshooting guides

Product maintenance and repair services, as needed

Regular software updates to improve product functionality

Comprehensive training and education programs for users and administrators

Our team of experienced technicians and support staff are available to assist with any technical issues or questions that may arise. We are committed to providing the highest level of service to ensure that our customers get the most out of their 3D Printed Parts product.

Packing and Shipping:

Product Packaging:

All 3D printed parts will be carefully packaged in protective foam or bubble wrap to ensure they arrive at their destination in perfect condition.

Shipping:

We offer worldwide shipping for our 3D printed parts. Shipping costs will vary depending on the destination and size of the order. We strive to process and ship all orders within 3 business days of receiving them.

FAQ:

Q: What is the brand name of the 3D Printed Parts product?

A: The brand name of the product is ywy.

Q: What is the model number of the 3D Printed Parts product?

A: The model number of the product is ywy222.

Q: Where is the 3D Printed Parts product manufactured?

A: The product is manufactured in guangdonghuizhou.

Q: Are the 3D Printed Parts customizable?

A: Yes, we offer customization services for our 3D Printed Parts. Please contact us for more information.

Q: What materials are used to make the 3D Printed Parts?

A: We use a variety of materials including PLA, ABS, PETG, and Nylon to make our 3D Printed Parts.
